Professional Summary

Final-year **B.Tech (CSE – AI)** candidate with 3 deployed projects spanning web development, NLP, and applied AI tooling. Built a resume feedback tool, a 12-algorithm visualization platform, and a fitness tracking application – each shipped end-to-end from backend logic to UI. Comfortable across **Java, Python, React.js, and SQL**, with working knowledge of **Agentic AI tooling** (LangChain, LangGraph, RAG pipelines). **Codeforces Specialist** (1400+ rating). Targeting **SDE / Applied AI Engineer** roles at product-based engineering teams.

Education

B.Tech, Computer Science Engineering – Artificial Intelligence

Noida Institute of Engineering and Technology, Greater Noida, India

Nov 2022 – Present

12th Grade (86%)

Parmeshwari Devi Dhanuka SVM, Vrindavan, India

Apr 2020 – May 2021

10th Grade (86%)

Bhaktivedanta Gurukula and International School, Vrindavan, India

Apr 2018 – Apr 2019

Technical Skills

Languages: Java, Python, SQL, JavaScript

LLM Engineering & Agents: LangChain, LangGraph, LangSmith, Prompt Engineering (CoT/ReAct/Few-shot), LLM APIs (Anthropic Claude, OpenAI), Function Calling, Model Context Protocol (MCP), CrewAI Multi-Agent Systems

RAG & Vector Stack: RAG Pipelines, Agentic RAG, FAISS, ChromaDB, Pinecone, SentenceTransformers, Semantic Search, RAGAS Evaluation

Deep Learning & Fine-tuning: PyTorch, HuggingFace Transformers, TensorFlow 2.x, LoRA, QLoRA, PEFT, Instruction Tuning, Transformer Architecture

ML / NLP: Scikit-learn, NLTK, TF-IDF, Tokenization, Lemmatization, Bigram Analysis, Pandas, NumPy, Matplotlib, Seaborn, Confusion Matrix Analysis

Frontend & Tools: React.js, HTML5, CSS3, Tailwind CSS, Responsive Design, Vite, Git, GitHub, Postman, Google Colab, Jupyter Notebook, VS Code

Backend & Database: REST APIs, MySQL (Joins, Indexing), MongoDB, JSON

Core CS: Data Structures & Algorithms, OOP, DBMS, SDLC, Agile Development, API Integration

Projects

AI Resume Analyser

[GitHub](#)

Python, React.js, NLP, TF-IDF, NLTK, Anthropic Claude API

- Developed a resume analysis tool using **Python, React.js, and NLP** that parses uploaded resumes and returns structured feedback on skills, formatting, and **ATS compatibility** via the **Claude API**.
- Engineered **NLP-driven keyword extraction** (TF-IDF, NLTK) to match candidate profiles against job descriptions, generating a quantified match score and **5+ targeted improvement suggestions** per analysis.
- Designed a **React.js** frontend enabling resume uploads and AI-generated insights with **zero page reloads**, returning a full analysis in under **3 seconds**.

Algorithm Visualizer

[GitHub](#)

HTML5, CSS3, Vanilla JavaScript, DOM API

- Created an algorithm visualization platform covering **12** sorting and searching algorithms, translating abstract computer science concepts into real-time animated walkthroughs using HTML, CSS, and JavaScript.
- Added interactive controls for adjustable array size, animation speed, and step-through execution mode using modular **vanilla JavaScript**—zero external dependencies—enabling self-paced learning.
- Delivered a **95+ Google Lighthouse** performance score through optimized DOM manipulation and consistent **60 FPS** rendering.

Swoley-Fit

[GitHub](#)

React.js, Tailwind CSS, Vite

- Built a fitness tracking web application using **React.js, Tailwind CSS, and Vite**, featuring an auto-generated workout planner, exercise library, and progress dashboard across **3+ muscle group categories**.
- Structured application state with **React hooks** (useState, useEffect) and a component-based architecture, ensuring consistent UI rendering across mobile, tablet, and desktop viewports without external state libraries.
- Configured **Vite's** module bundler to reduce production build size by **30%** compared to Create React App baseline, improving page load performance.

Achievements

- eLitmus pH Test:** Scored in the **86.5th percentile** for quantitative reasoning, logical analysis, and problem-solving.
- Codeforces – Specialist:** Reached a competitive rating of **1400+** in Codeforces competitive programming.
- Solved **250+ coding problems** across LeetCode and GeeksforGeeks, improving problem-solving accuracy by **35%** within one year.

Certifications

- Oracle Cloud Infrastructure 2025 Generative AI Professional** – Oracle University (Sep 2025, valid until 2027)
- AWS Cloud Practitioner Essentials** – Amazon Web Services (Mar 2026)
- Artificial Intelligence with Machine Learning in Java** – Oracle Academy (May 2025)
- Python for Data Science, AI & Development** – IBM / Coursera (Apr 2023)
